

PREFACE

The Department of Statistics is pleased to release the results of the 2010 Census of Population and

Housing. The 2010 Census is the 19th decennial census to be conducted in The Bahamas. This

publication is the first in a series of publications that will present the final results of the 2010 Census of

Population and Housing.

The planning and execution of The 2010 Census were carried out mainly by the staff of the Department of

Statistics. For this and previous censuses, The Bahamas participated in a joint census program for the

English-Speaking Caribbean Countries. As a result, the planning followed guidelines that were

established by the Regional Census Coordinating Committee (RCCC). Therefore, the concepts and

definitions used in this and previous censuses allow for comparability at both the regional and

international levels as well as with earlier censuses.

We have in this report made an attempt to present a snapshot of the social and demographic situation of

The Bahamas, taking into consideration the data needs of both the policy makers and the general

population. In the very near future, more detailed census data will be made available through various

forms of data dissemination tools along with special topic monographs.

For the 2010 Census, four different questionnaires were used to collect information for both the individual

and the dwelling unit:-

1. Individual Questionnaire which was completed for every person residing in The Bahamas at

the time of the census.

2. Institutional Questionnaire which was used to collect data on persons residing in collective

dwellings or institutions.

3. Housing Questionnaire which was completed for private and collective dwellings.

4. Vacant Questionnaire which was used to collect information on private dwellings that was

vacant at the time of the census.

Data derived from the individual questionnaire relating to the age, sex, marital status, union status,

religion, racial group, citizenship, and educational characteristics of the population are presented in this

release. Data relating to private dwellings, household, head of households and type of dwelling structure

are also presented in this report.

Kelsie Dorsett

Director of Statistics

August 2012

i

ACKNOWLEDGEMENTS

The Department of Statistics extends sincere, heartfelt gratitude to the many individuals and organizations that assisted and contributed significantly to the success of this census. The generous support and efforts of the following persons, committees and organizations were vital to the planning, execution and successful completion of the Census exercise.

Many thanks to the members of the Census Advisory Committee who gave of their knowledge and collaborated with the staff of the Department of Statistics in the preparation, organization and taking of the Census. Those committee members were: –

Mrs. Kelsie Dorsett - Director of Statistics, Census Coordinator

Mrs. Leona Wilson – Deputy Director of Statistics, Census IT Consultant

Ms. Nerissa Gibson – Assistant Director, Statistics

Mrs. Clara Lowe – Assistant Director, Statistics, Census Officer Northern Region

Ms. Coralee Mackey - Senior Statistician, Statistics, Chief Census Officer

Mrs. Kim Saunders – Statistician I, Statistics, Census Officer Family Islands

Mr. Simon Wilson – Director, Economic & Planning Unit, Ministry of Finance

Mrs. Carmen Gomez - Under Secretary, Ministry of Culture

Ms. Mellany Zonicle – Director of Social Services

Ms. Iris Adderley – Consultant, Disability Affairs

Mr. Revis Rolle - Family Island Administrator, Department of Lands & Local Government

Mr. Dwayne Miller – Bahamas National Geographic Information System

Mr. William Fielding - Planning Department, College of the Bahamas

Bishop Dr. John N. Humes – Bahamas Christian Council

Mr. Stephen Miller – Bahamas Public Services Union

Mr. Samuel Moss – Deputy Director Immigration

Mr. Marcellus Taylor – Director of Planning & Research, Ministry of Education

Captain Stephen Russell – National Emergency Management Agency (NEMA)

Sgt. Chaswell Hanna – The Royal Bahamas Police Force

Sub-Census Advisory Committee

Mrs. Theressa Moxey-Ingraham – Executive Director, Sojourner-Douglas College

Mr. Stephen Plakaris – Success Training College

Ms. Raquel Bethel - Bahamas Technical and Vocational Institute

Ms. Beverley Saunders - Director of Training, Atlantis

We extend our sincere appreciation to the following organizations which assisted with sensitizing the public to the Census: - The Bahamas Information Service (BIS), The Counsellors Ltd., The Nassau Guardian, The Tribune, The Bahama Journal, The Punch, The Freeport News, ZNS Radio and TV, 100 Jamz, More FM, Love 97, Cool 96, Island FM, Star, ZNS television, Cable T.V. and Quality Business Centre (QBC).

We also appreciate the efforts made by Government Printers and Swaby Printers in the design and printing of the Census posters. Likewise, special acknowledgement is made of the Alpha Kappa Alpha Sorority and in particular Asheka Culmer who also designed and produced leaflets and posters. Some of these items were printed in Creole and for that we thank Daniel Wolmy for the translation.

We express our gratitude to Ben Jarnutowski and the staff of Clearview Printing for their professionalism in the production of the questionnaires and ensuring their timely delivery.

We are indebted to BTC, specifically Marlon Johnson, for the donation of phone cards which enabled field workers throughout the country to communicate with their supervisors and the head office.

Special mention and thanks must be given to the managers of The Town Center Mall, the Mall at Marathon, City Markets Food Store, Super Value and other such stores throughout the country for allowing census posters to be displayed on their premises. We also wish to thank The Bahamas Christian Council and various religious denominations which promoted the Census within their services.

We commend our Family Island Administrators and District Superintendents for their untiring efforts and assistance to the census exercise. We wish to also commend the Area Managers and Supervisors for their generous support and commitment to getting the job done. (See Appendices for the names of area managers and supervisors).

We especially want to thank the twelve hundred (1200) enumerators and interpreters for completing the most difficult aspect of the census, the field work.

A sincere thank you to the Ministry of Education, Youth and Sports, The Bahamas Red Cross and East Street Gospel Chapel for the use of their schools, premises and facilities as training centers and field offices during the census exercise. Likewise, we take this opportunity to thank all heads of government agencies who released their staff to attend the training sessions.

To former Attorney General Claire Hepburn and Mr. Don Cornish, Administrator, Grand Bahama, who presided over the swearing in of enumerators, Rev. Patrick Paul, the then President of The Bahamas Christian Council, Superintendent Wayne Miller of the Royal Bahamas Police Force and the then Minister of State for Finance, Zhivargo Laing and Minister Kenneth Russell, who graciously addressed the fieldworkers, and all others who took part in the Swearing In Ceremony, many thanks.

Gratefully, we acknowledge the assistance of Mrs. Insa Frith, Yvette Thompson and the GIS team in the GIS Unit for providing digital maps for the census field work.

Special acknowledgements and thanks must be given to Ms. Lynn Williams and her team in the Data Processing Section, including Melissha Ellis, who successfully and expeditiously managed all aspects of the data processing of the census. We also, take this opportunity to express our gratitude and appreciation to our Deputy Director Mrs. Leona Wilson for assisting the data processing team in expediting this process. Likewise, we express thanks to our Accounting team headed by Deborah Bridgewater who relentlessly worked at ensuring that all our financial needs and payments were expedited in a timely manner.

At the international and regional level, special thanks to Mr. John Mensah, Chairman of the Regional Census Coordinating Committee, Dr. Philomen Harrison and the CARICOM team for their overwhelming support in preparation for the 2010 Census Round. Additionally, special thanks is extended to the International organizations such as United Nations Population Fund (UNFPA), International Development Bank (IDB), the Ninth European Development Fund and United Nations Statistics Division (UNSD) for their assistance in funding several census-related workshops. We especially thank Paul Cheung, Director, United Nations Statistics Division and his assistant, Yacob Zewoldi for spending three days in the country promoting the Census by appearing on television and radio programmes, making presentations at Civic clubs and schools. Likewise, we convey our deepest gratitude to Philemon Harrison and several of the Directors of Statistical Offices in the Caribbean for accompanying Mr. Cheung and Zewoldi and contributing greatly to the promotional exercise.

These directors were Sonia Jackson (Jamaica), Iwan Sno (Suriname), Edwin St. Catherine (St. Lucia) and

Dave Clement (Trinidad).

To the Bahamian Public, without whose assistance and co-operation, the taking of the census could not

have succeeded and all others who have participated in or contributed to the Census program, we extend

our sincere thanks and gratitude.

Finally, our sincere gratitude and appreciation to the many staff members of the Department of Statistics

who participated in the Census exercise; special mention must be given to the staff of the Census Office

and in particular the staff of Census Stores headed by Mrs. Lillian Newbold who had the awesome task of

documenting and controlling the flow of the census questionnaires, and others who participated in the

field work, coding and editing.

DATA HIGHLIGHTS

The final results of the 2010 Census indicate that at May 3, 2010 there were 351,461 persons resident in The Bahamas. Residents included all persons regardless of their legal status who on Census Day (May 3, 2010) had been living in The Bahamas for a period of six months prior to Census Day. Of the 351,461 persons residing in The Bahamas, 348,884 lived in private dwellings and 2,577 lived in non-private dwellings.

Population Growth and Change

The population growth of 15.8 percent over the past decade was 3.2 percentage points lower than that of the previous decade (1990-2000) when the growth was 19.0 percent. This decadal growth is the lowest since the increase of the 1950's (the period between 1953 and 1963) when the growth was 53.5 percent; the highest ever recorded in the history of The Bahamas (Table i below and Trend Table 1.7).

Population Growth For Census Years: 1901 - 2010

| 18 | IDI | e i | |
|----|-----|-----|--|
| | | | |
| | | | |
| | | | |

| | | Percent | Average |
|-------------|------------|---------|---------------|
| Census Year | Population | Growth | Annual Growth |
| | | | |
| 1901 | 53,735 | 12.97 | 1.3 |
| 1911 | 55,944 | 4.11 | 0.4 |
| 1921 | 53,031 | -5.21 | -0.6 |
| 1931 | 59,828 | 12.82 | 1.2 |
| 1943 | 68,846 | 15.07 | 1.2 |
| 1953 | 84,841 | 23.23 | 2.0 |
| 1963 | 130,220 | 53.49 | 4.4 |
| 1970 | 168,812 | 29.64 | 3.8 |
| 1980 | 209,505 | 24.11 | 2.2 |
| 1990 | 255,049 | 21.74 | 2.0 |
| 2000 | 303,611 | 19.04 | 1.8 |
| 2010 | 351,461 | 15.8 | 1.6 |

This decline in the pace at which the population grew between the two latest decades, trickled down into several of the family islands which experienced shrinkages in their population. The islands of Cat Island, Inagua, Crooked Island, San Salvador and Andros experienced declines of 7.6, 5.8, 5.7, 3.1 and 2.6 percent respectively. Islands that showed substantial growth were Exuma (94.0%), Abaco (30.8%), Acklins (32.0%) and Rum Cay (23.8%). Ragged island experienced no growth.

Although the island of New Providence experienced a decline of 5.6 percentage points in its growth over the decade from 22.4% in 2000 to 16.8% in 2010, its growth was still above the national average (15.8%). New Providence experienced the largest actual increase in population, 35,497, representing almost three quarters (74%) of the total growth of 47,850 persons (**Table i.i**).

Population Change By Island: 2000 And 2010

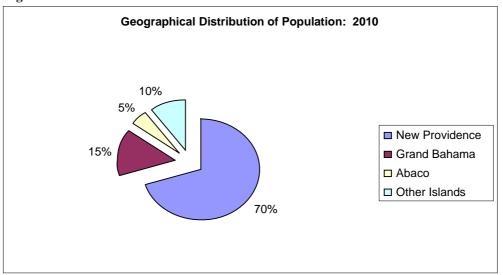

Table i.i

| | Popu | lation | Char | nge |

| Spanish Wells | 1,527 | 1,551 | 24 | 1.57 |

Geographical Distribution of Population

The three most populated islands (New Providence, Grand Bahama and Abaco) accounted for 90% of the total population of The Bahamas in 2010 as seen in **Figure 1.** The increase in New Providence's population over the decades to a large extent is attributed to internal migration; this decadal period was no different. Eleuthera, Andros and Exuma accounted for 6.4% of the remaining 10% of the population, while the balance of 3.6% resided on the other thirteen inhabited islands and cays (**Table ii**). Internal migration is the movement of people from one island to the other.

Figure 1

Percent Distribution Of Total Population By Island For Census Years: 1990 - 2010

| Spanish Wells | 0.54 | 0.50 | 0.44 |

Population Density

Population density is a term that describes the number of individuals occupying an area in relation to the size of that area. It is measured by the number of inhabitants per square mile or kilometer and is calculated by dividing the population by the area. The population density is also a way of showing how crowded a place is in comparison to its land area. The overall population density of The Bahamas increased from 56.4 persons in 2000 to 65.3 persons per square mile in 2010.

An examination of density by island indicates that there were significant increases for some of the islands, particularly those of New Providence, Exuma and Bimini. New Providence continued to be the most densely populated of the three; recording a population density of 3,079 persons per square mile, an increase of 16.9% or 444 more persons per square mile, Exuma and Bimini recorded a 94% and 16% increase over the period resulting in an additional 30 and 25 more persons per square mile respectively for these islands (**Figure 2 and Table iii**).

Figure 2

Of particular interest is the island of Andros, which has the largest land area per square mile of all inhabited islands in The Bahamas, however, its population of 3.3 persons per square mile has remained virtually unchanged for the past two decades. This island has continued to lose population since the 1970's when its density of 3.9 persons per square mile was its highest ever recorded (**Trend Table 1.6**).

Land Area And Population Density By Island: 2000 And 2010

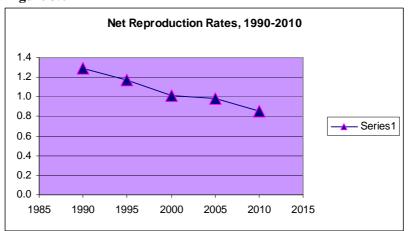

Table iii

| | Land Area | 2000 | 2010 | Population |
|---|--------------|-------------|-------------|------------|
| | (Square | Pop Per | Pop Per | Increase/ |

| San Salvador and Rum Cay | 90 | 12 | 12 | 0 |

Age Distribution

The proportion of the population under the age of 15 declined 2.6 percentage points from 29.4% of the total population in 2000 to 26.8% in 2010. This decline was anticipated and incorporated in the 2000-2030 Population Projections which projected that the proportion of the population under 15 years would decline in 2010. As early as the 1990's there were indications that the population of The Bahamas was heading toward replacement level fertility. This was made evident in the declining Annual Net Reproduction Rates (NRR) over the past two decades as seen in Figure 3.0

Figure 3.0

The NRR measures the extent to which one generation is replaced by the next generation. A net reproduction rate of 1.0 indicates that one generation is exactly replaced by the next generation. However, a NRR of less than 1.0 indicates that one generation is not being replaced by the next generation. In the case of The Bahamas, the NRR has been below 1.0 during the past decade indicating that the population is basically not reproducing itself naturally.

The working age population 15-64 years was projected to account for 68.8% of the total population in 2010. However, according to the 2010 Census, the totals recorded for this age group was below the projected figure by 2 percentage points. The proportion of the population of working-age increased 1.9 percentage points in 2010 to 66.8% from 64.9% in 2000. When disaggregated, the younger working age population, 15-44, accounted for 47.4% of the working age population and the older ages 45-64, 19.4%. The population 65 and over, 21,629 persons, represented 6.2% of the total population in 2010 compared to 5.2% of the population in 2000. The data in **Table iv** shows the total and percent distribution of the population by selected age-groups and change over the decade.

Population Change by Selected Age-Groups

Between 2000 and 2010, the population under 15 years of age increased 5.4 percent while the working-age population, 15-64 years experienced a significantly higher increase of 19.1%. Within this major age group, the increase was modest (10.2%) for persons between 15-44 years of age. This contrasts with the substantially faster growth of 48.2% experienced by the older group, persons 45-64. The large increase in this age-group can be attributed to the aging of the baby boom population (persons born 1946-1964). The population age 65 and over also grew at a faster pace 37.1% than the population under age 45 (**Table iv and Table iv.i**).

Population By Sex, Selected Age-Groups And Median Age: 2000 and 2010

Table iv All Bahamas Change 2000 2010 2000 to 2010 Sex and Selected Number % Number Number Age-Groups % % 303,611 351,461 47,850 **Total Population** 100.0 100.0 15.8 Sex 170,257 Male 147,715 48.7 48.4 22,542 15.3 Female 155,896 181,204 25,308 51.3 51.6 16.2 **Under 15 Years** 89,329 29.4 94,119 26.8 4,790 5.4 15-64 197,091 64.9 234,744 66.8 37,653 19.1 15-44 151,133 49.8 166,623 47.4 15,490 10.2 45-64 68,121 45,958 15.1 19.4 22,163 48.2 65 Years and Over 15,777 5.2 21,629 6.2 5,852 37.1 Median Age 27.0 (N/A) 29.4 (N/A) (N/A)

(N/A) Not Applicable

Median Age

Changes in the age structure of the population also impacted the median age. The median age is the age at the midpoint of the population, i.e., half of the population is older than the median age and half is younger. In 2010 the median age increased to 29.4 years from 27.0 years in 2000 (**Table iv**). The 2.4 years increase was slightly lower than the 3.4 year increase between 1990 and 2000. This increase in the median age is a sign that the population of The Bahamas is aging.

Centenarians

Centenarians are defined as people 100 years and over. Data in **Table iv.i** show that there were 27 centenarians recorded in the 2010 census, resulting in a 59% increase from 2000, when there were 17 people who were at least 100 years old. The number of females to males was almost 4 to 1 in the centenarian population as there were six (6) males and twenty one (21) females. Eighty-five percent (85%) of the centenarians lived on the island of New Providence and Grand Bahama, 70% and 15% percent respectively.

Population 65 Years And Over By Age-Group: 2000 and 2010

Table iv.i **All Bahamas** Change 2000 2010 2000 to 2010 **Number** % **Number** % **Number** % Age-Group 100.0 100.0 47,850 15.8 303,611 **Total Population** 351,461 5,852 37.1 65 Years and Over 15,777 5.2 21,629 6.2 65-69 5806 36.8 8174 37.8 2,368 40.8 70-74 4072 25.8 5889 27.2 1,817 44.6 75-79 3655 1,040 39.8 2615 16.6 16.9 80-84 1919 12.2 2209 10.2 290 15.1 114 12.5 85-89 914 5.8 1,028 4.8 182 54.2 90-94 336 2.1 518 2.4 95-99 98 0.6 129 0.6 31 31.6 100 Years And Over 17 27 10 58.8 0.1 0.1

Sex Ratio

Another important indicator of population composition is the sex ratio which is a common measure used to describe the balance between males and females in the population. It is defined as the number of males per females. A sex ratio of exactly 100 would indicate an equal number of males and females, with a sex ratio of less than 100 indicating a greater number of females.

According to the 2010 Census there were 170, 257 males and 181,204 females for a sex ratio of 94 males per 100 females. Males outnumbered females on the majority of the islands, particularly on Ragged Island, Berry Islands, Acklins and Biminis, where the ratio was 157, 133, 131 and 115 to 100 respectively. The ratio of males to females was almost equal on the island of Exuma where it was 100.2 showing that there was only a slight excess of males over females. New Providence, Grand Bahama and Spanish Wells were the top three islands where females outnumbered males 92 and 95 respectively as seen in **Table v**.

Sex Ratio By Island: 2010 Census

Table V

| Sex Ratio, Males Per 100 Females | | | | | | | |

Citizenship

Seventeen point three percent (17.3%) of the population of The Bahamas were citizens of another country, up 4.6 percentage points from 2000 when the non-bahamian population represented 12.7% of the total population as illustrated in **Figures 4.0 and 4.1**. The population with Bahamian citizenship grew by a modest 9.6% over the decade, from 265,157 in 2000 to 290,725 in 2010.

Figure 4.0

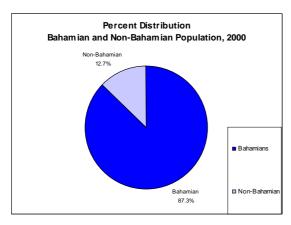

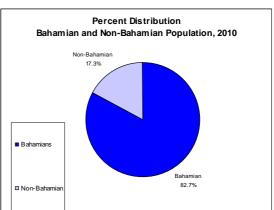

Figure 4.1

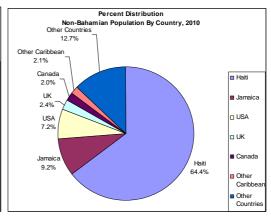

The majority of the non-bahamians were from Haiti (64.4%), Jamaica (9.2%) and the United States of America (7.2%), and to a lesser extent from the United Kingdom (2.4%) and Canada (2.0) (**Figures 5.0 and 5.1**).

Figure 5.0

Figure 5.1

Race

In 1722 when the first official census of The Bahamas was taken, 74% of the population was white and 26% black **as seen in Figure 6.0.** Three centuries later, and according to the 99% response rate obtained from the race question on the 2010 Census questionnaire, 91% of the population identified themselves as being black, five percent (5%) white and two percent (2%) of a mixed race (black and white) (**Figure 6.1**).

Figure 6.0

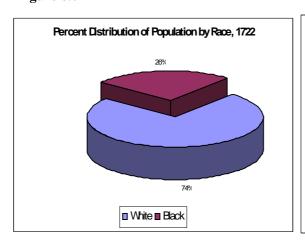

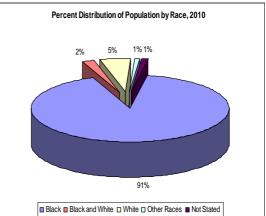

Figure 6.1

Religion

Over the past several censuses with 2010 being no exception, the three principal religious denominations have remained the same – Baptist, Anglican and Roman Catholic. When compared to the results of the 2000 Census, all three groups experienced growth in their membership. The Baptist significantly increased by 14.1% to 122,500 persons over the 2000 figure of 107,354. Likewise, the Anglican increased by 4.4% to 48,006 persons over the 2000 figure of 45,993 and the Roman Catholic increased by 2.9% to 42,287 persons over the 2000 figure of 41,077.

However, all three major religious groups experienced a decrease in their percentage share of the population. Although the Baptist maintained its status as the largest denomination by capturing 34.9% of the population in 2010, its percentage share of the population when compared to 2000, remained basically unchanged with less than one percentage point decrease. The Anglican's share fell from 15.1% in 2000 to 13.7% in 2010 while the Roman Catholic declined from 13.5% in 2000 to 12.0% in 2010.

In contrast, the 'Other Christian Denomination' which includes non-denominational churches increased significantly both numerically and in percentage share. The numbers grew from 19,414 in 2000 to 41,214 in 2010, an increase of 112.3%. In 2010, this group almost doubled its percentage share of the population accounting for 11.7% of the population compared to 6.4% in 2000.

Marital Status

For the population 15 years of age and over, married persons accounted for 35.9% in 2000. This percentage climbed to 38.8% in 2010, representing an increase of 2.9 percentage points. More specifically, 99,744 persons reported that they were married in 2010 compared to the 76,960 who reported in 2000.

Single or never married persons increased from 44.3% of the total population 15 years and over in 2000 to 51.3% in 2010 while the proportion of divorced persons increased from 3.4% to 4.5%. Conversely, the percentage of persons widowed decreased slightly from 4.4% in 2000 to 4.2% in 2010.

When analyzing the percentage change between intercensal years, the married category increased by 29.6% and the single group experienced a 38.8% increase. However, the number of divorced persons grew from 7,326 in 2000 to 11,452 in 2010, a significant increase of 56.3%.

Education

This brief analysis on education focuses on three educational features as follows:

School Attendance

Table 10.0 shows the population 3 years and over by age, sex and school attendance. With the implementation of government pre-schools, more children have the opportunity to begin their early education at age 3 and this is supported by the data which indicate that one third of the children between 3-4 years of age were attending preschool.

According to the 2010 Census, the proportion of persons 5 years and over attending school increased by 13.7% since 2000. As with previous censuses, more than half of the persons attending school full and part-time were females.

The data further shows that up to age 19, there was minimal difference in full-time school attendance between the sexes. However, from age 20 onwards, females accounted for slightly more than two thirds of the persons in school. Seven and a half percent of females 20 and over were in school while amongst males, the proportion was 4%. The largest difference between school attendance by sex was seen in the part-time attendance where 69.1% of the students were females.

Educational Attainment of the Population 15 Years and Over Not Attending School

The level of education attained by persons 15 years and over, who were not attending school at the time of the Census is presented in Table 12.0. Of these persons, 1.9% or 4,211 had no schooling, compared to 1.5% or 2,801 persons in 2000. The percentage of persons who had received only primary education decreased from 8.7% in 2000 to 7.8% in 2010 and those with only secondary education declined from 73.6% in 2000 to 61% in 2010. While decreases were observed at these levels, the 2010 Census results verify that more persons opted to further their education beyond the secondary school level.

An estimated 43,467 persons in the country attended college. Females accounted for 61% of this number. When the targeted population is further examined by sex, it is noted that almost one quarter (23%) of females 15 years of age and over and 16% of the males had some level of college education.

Highest Qualification

According to the 2000 Census, almost half of the population 15 years and over (46.2%) had no qualifications. Data provided in Table 13.0 shows that this percentage decreased to 31% in 2010.

The lack of qualification was more extreme for older persons as two thirds of the persons 65 and older had no qualification. For the younger persons, example, those between 25 and 34, the proportion without qualifications was significantly lower at 22.4%. When the population without qualification is examined by sex, it is noted that 34% of all males and 27% of females had no qualification. Of the persons without qualifications, males accounted for 53%.

The number of degree holders increased over the intercensal years. In 2000, approximately 12.8% of the population 15 years and over possessed a university qualification and by 2010, this percentage increased to 16.1%. Of the persons with degrees, those with an Associate Degree accounted for 33.4%, Bachelor Degree 50.2%, Masters Degree, 14.1% and Doctorate Degree, 2.4%. Of all degreed persons, women accounted for 63%. This noticeable increase in the number of degree holders is likely attributed to the increased availability of local under and post graduate institutions and the greater accessibility to on–line and distance-learning degree programmes.

The data shows that of the individuals reporting a degree as their highest qualification, women outnumbered men, 60% in all categories except in the Doctorate Degree which was dominated by males, 54%. In almost every age category, more females than males have attained a tertiary-level educational qualification. The exception to this is seen in the age category 65 years and over where males accounted for 74% of persons with a Doctorate Degree and 51% of those with a Masters Degree.

Internet Access and Usage

A nation's progress can be measured by its access and use of technological and communication equipment. According to the 2010 Census, 64.7% of the population 3 years and over had access to the internet (**Table 14.0**). When the population 10 to 64 years is examined, it is noted that the largest proportion of persons with internet access was between 35 and 44 years of age accounting for 16.9% of all users. On the other hand, access was lowest, 6.8%, for persons in the 55-64 age groups.

Data provided in Table 15.0 shows that regardless of the age group, "home" appeared to be the most popular location where individuals used the internet as it accounted for 81% of the population under review. On the other hand, cellular phones/PDAs were the least popular choice.

Among persons accessing the internet, females accounted for 53% and outnumbered males in almost all access categories. The two exceptions were internet café and cellular phones/PDAs where men accounted for 63.5% and 64.6% respectively of all users.

Access to the internet was more common to females as 67% of them had access compared to 62% of the males.

Private Health Insurance

For the first time in the history of the Bahamian Census, a question on private health insurance was introduced. According to the 2010 results, 185,477 persons or 52.8% of the population did not have health insurance. By island, the proportion of persons without insurance ranged from 37.2% in Inagua to 79.8% in Mayaguana. (**Tables 16.0 and 16.1**)

Inagua, San Salvador and Rum Cay and Crooked Island were the only islands which reported that more than half of the population had private health insurance, be it individual, group insurance or both. The nation's capital, New Providence was recorded as having approximately 49% of the population medically insured.

A small proportion of the population had individual and group insurance, 2.8%. This proportion ranged from less than 2% on islands such as Ragged Island, Spanish Wells, Long Island, and Abaco to a high of 9.6% on Inagua.

The Census results also show that females are more likely to have private health insurance as 47.4% of them were insured compared to 45% of the males.

Housing Stock

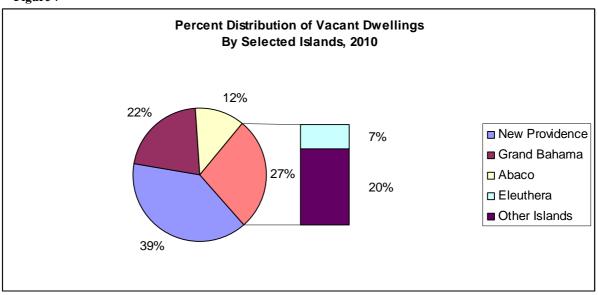

According to the 2010 Census, there were 126,493 dwelling units in The Bahamas. Of these 102, 862 were occupied or had people living in them on Census Day and 23, 631 were vacant (**Table vi**). Between 2000 and 2010, the housing stock increased 26.2% representing an additional 26,276 dwelling units. The number of vacant dwellings however, almost doubled from 12,110 in 2000 to 23,631 in 2010, a 95% increase. More than half of the vacant dwellings were on the islands of New Providence 39%, Grand Bahama 22%, Abaco 12% and Eleuthera 7%. The Other Family Islands cumulatively accounted for the remaining 20% (**Figure 7**).

Total Dwelling and Dwelling Unit Status: 2000-2010

Table vi

| | | Dwelling Status | | | Dwelling | Status |

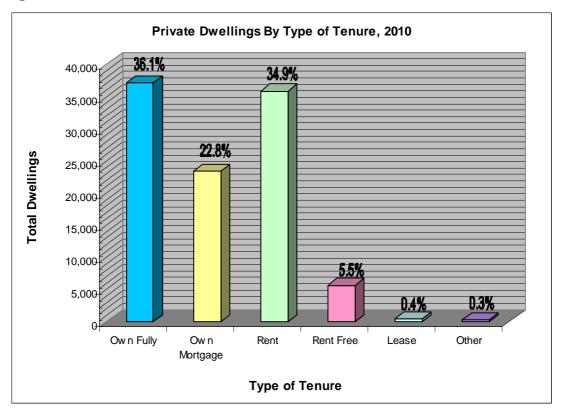

Figure 7

Dwellings were divided into two main groups, private dwellings and collective dwellings. Private dwellings were those in which a family or small group of individuals resided such as a single house, apartment or townhouse. Collective Dwellings included hospitals, the prison, children and old folks' homes, convents and other group homes where fairly large numbers of unrelated persons resided. When the total occupied dwellings 102,862 were disaggregated 102,758 were private and 104 were collective.

Fifty nine percent of the private dwellings were homeowner occupied and 35% were renter occupied. However, when homeowner occupied dwellings were disaggregated by own fully and own with a mortgage, there was a 1.2 percentage point difference between households that owned their dwellings fully and households that were renting their dwellings as seen in **Figure 8 and Table vii.** Home ownership was more prevalent in the Family Islands, where on seven of the islands more than 70% of the householders owned their homes. Among these islands the proportion of homeowners ranged from 71% on Crooked Island to 82% on Long Island. (**Table viii**).

Private Dwellings and Heads of Households

The following paragraphs briefly analyze private dwellings by sex and age-group of head and household size for 2010.

Private Dwelling Count and Household Size

The number of private dwellings increased 17.1 percent, from 87,742 in 2000 to 102,758 in 2010. For the same period, the population increased from 303,611 to 351,461, resulting in a 15.8 percent increase. Therefore, private dwellings grew faster than the population between 2000 and 2010. More than half (sixty-eight percent) of the households were in New Providence. The three major populated islands, Abaco, Grand Bahama and New Providence, comprised 88 percent of The Bahamas' private dwelling count. (See Figure 9).

Data provided in **Table ix** allows an examination of the changes in totals and percentage distribution of private households between 2000 and 2010. During this period the average household size remained the same at 3.4 persons. However, there were shifts in the composition of the households as it pertained to the size. The one-person household decreased slightly by 1 percent, from 18,407 to 18,220, for the respective years. Larger households, that is, those with eight or more persons also decreased, in this instance by 7.3%, resulting in their share of total households declining from 5.1% in 2000 to 4.0 in 2010. Dwellings housing three and four individuals were the significant contributing factors to the growth in the private households.

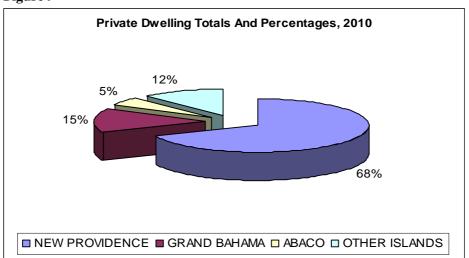

Percentage Distribution Of Private Dwellings By Household Size And Intercensal Change

Table ix

| Size Of | 200 | 0 | 20 | 10 | Intercensal Change (2000 - 2010) | | | | |

| 102,758 | 70,166 | 15,110 | 5,195 | 12,287 |

Household Sex Composition

Data in **Table 19** show that more men (11, 329) than women (6, 891) lived alone. A trend which continued from 2000 when the figures were 11,995 and 6,412, respectively. Census 2010 also recorded more males (62,751) than females (40,007) heading households. This significant difference meant that 61% of the private households had male heads, while only 39% heads of households were females. In 2000, the percentages were 64% and 36%, respectively.

Age Factor

Fourteen percent of the heads of household were 65 and over. Twenty-two percent of this age group lived alone. While there were more males (7,688) than females 6,685) who were 65 years old and over heading households, more females (1,856) in this age group than males (1,405) lived alone. It is noteworthy that this age group had the highest number of female heads of household living alone, while the highest number of males (2,871) living alone fell in the age group 35 to 44 years old.

The median age of the Bahamian household head is 45 years and the majority of the household heads (52,877) were between the ages 35 and 54 years old. This age group headed more than half the households (51.5 percent). The proportion of men in this age group was 63.1 and women accounted for 36.9 percent.

APPENDIX II

2010 CENSUS OF POPULATION AND HOUSING

CONCEPTS AND DEFINITIONS

APPENDIX II

2010 CENSUS OF POPULATION AND HOUSING

CONCEPTS AND DEFINITIONS

Concepts and Definitions

The concepts and definitions on which the Census questions were based were in compliance with the guidelines established by the Regional Census Coordinating Committee (CRCC). This was to allow for comparability at both the regional and international levels as well as with earlier census results.

1. Census Day

Census Day was Monday, May 3, 2010. This was the reference day and therefore, all questions on the questionnaire (excluding the economic activity and fertility) referred to the circumstances existing on this particular day. Field enumeration began on Tuesday, May 4th.

2. Record of Visits

This is the record of the list of households and the composition of these households which was kept by the enumerator. It also serves as a register of all households, business places and institutions in The Bahamas. This register is used as a frame for the designing of Household and Business Surveys carried out in the intercensal years.

3. Population

The Total Population consisted of the following:

- (i) Persons in their usual place of residence on Census Day eg. family members, lodgers and live-in employees
- (ii) Persons who were temporarily away on a business trip, on vacation or away at school or university
- (iii) Persons in hospitals or other institutions
- (iv) Newborn babies in hospital (born by Census Day May 3rd)
- (v) Persons with no fixed place of abode
- (vi) Bahamians serving in the diplomatic corps who were resident abroad
- (vii) Spouses who worked on another island but come home periodically.

4. Supervisory District

A geographical area (synonymous with the 2010 political boundaries) for which data were collected. These geographical areas consist of smaller areas called enumeration districts.

5. Household

The term 'household' refers to a person or group of persons who live in a private dwelling unit. The concept of "household" is based on the arrangements made by persons individually or in groups for providing themselves with food and other essentials for living. Anyone of the following may constitute a household.

- (i) a person living alone
- (ii) one or more family(ies) with or without lodgers or servants
- (iii) a group of unrelated persons living together
- (iv) occupants of an institution, hotel, convent, etc.

6. Head or Reference Person of Household

This is the person who was acknowledged by the interviewee and other members of the household to be the head of the household.

7. Family

For Census purposes, the following constitutes "Families":

ALL MEMBERS RELATED:

- Married couple, with or without child/ children (The children may be of one or both parents as long as these children are <u>not</u> married, nor separated, nor living with a partner, nor do they have any children living in the same household).
- Unmarried couple (common law union), with or without children
- Mother with child/ children

Father with child/children

Adult child/ children with live-in parent(s) only; (adult child is not married, not separated nor living

with a partner. However, he/she can be divorced.)

Adult child/ children with live-in parent(s) with other related persons under 18 yrs old (These related

persons under 18 years old will be considered as dependents of child/children).

Other adult relatives living with a child/ children under 18 yrs old. (i.e. grandparents with

guardianship of minors; Aunt/ Uncle with a niece/ nephew under 18 yrs; Adult siblings with

guardianship of younger siblings under 18 yrs, etc)

• Other relatives living together, none of whom constitute a family nucleus (all 18 yrs and older) –

siblings only.

NOT ALL MEMBERS RELATED:

Adult child with live-in parent(s) with other persons under 18 yrs old; (some or none are related to

the nucleus, i.e. the family reference person or the live-in parent)

Adult living with other persons under 18 yrs old; (all or some are non relatives).

8. Marital Status

"Marital Status" is the personal legal status of each individual in relation to the marriage laws or

customs of The Bahamas. The marital status options were as follows:-

Never married: a person who is single and has never been legally married.

Married: a person whose marriage has gone through a legal marriage ceremony in accordance with the

law.

Widowed: the individual was legally married but his/her spouse has died.

Divorced: the individual was legally married but has gone through legal proceedings for the marriage to

be officially dissolved.

Legally separated: applies to a married couple living apart as a result of the decision of the court or

legal system of the country.

167

9. Union Status

Union Status is the type of relationship that a man or woman was currently engaged in at the time of the census. The information obtained provides for further study on family formations, that is, how families are formed, the type of relationships children are born into and how children are being cared for in the home. The options were as follows:

Not in a union: the individual is not living with a partner, nor has he/she ever been legally married.

Legally Married: refers to a union in which an individual is currently living with the spouse to whom he/she is legally married to. Exceptions:

- (i) spouses who are temporarily apart for work purposes or other unavoidable circumstances
- (ii) Migrants who are residing in The Bahamas but their spouse lives in another island/country.

Common-law Union: the partners share a common household even though the union has not been established by a legal process. This union/ relationship has nothing to do with the individual's marital status.

Visiting Partner: refers to both males and females 15 years and older who have fathered or had child/ren in the last 12 months prior to Census Day. During the 12 month period that the child/ren were conceived, the parent was not currently living with a spouse or partner.

Married but not in a union: this person has been legally married but is currently living without a spouse/partner.

Legally separated and not in a union: this type of relationship/union refers to a person who has been married but is legally separated and is currently living without a partner.

Widowed and not in a union: this person has been legally married but due to the death of the spouse, they are widowed and is currently living without a partner.

Divorced and not in a union: this person was legally married but is currently legally divorced and is presently living without a partner.

10. Total Household Income

This is the aggregate income of all members of the household from all sources, which was earned, gained or obtained during the past 12 months. This includes income from wages and salaries, as well as income from property or other investments, private educational scholarships, pensions, welfare, alimony, child support, etc.

11. Building Unit

A building is any independent, free-standing structure comprising of one or more rooms or other spaces, covered by a roof and usually enclosed within external walls which extend from the foundation to the roof.

A building may be used or intended for residential, commercial or industrial purposes or for the provision of services. It may therefore be a factory, shop, detached dwelling, apartment building, shopping centre, church, repair shop, etc.

12. <u>Dwelling Unit</u>

To be classified as a dwelling, living quarters must be structurally separate and must have a private entrance either from the outside or from a common hall, lobby or stairway inside the building. The entrance must be one that can be used without passing through anyone else's living quarters.

Examples of dwellings are:-

- (1) Single Detached/ Single house
- (2) Single Attached (Dwelling units only)
 - (a) each half of a duplex, triplex, etc
 - (b) a large building that has been structurally sub-divided to contain more than one housing unit. Eg. A large house which has been converted into several units.
- (3) Part of a Private Dwelling: a self-contained private dwelling which has been partitioned off from other spaces in a single house.
- (4) Apartment/Flat (dwelling units only): this type is usually found one on top of the other, that is, the floor of one is the roof of the other.
- (5) **Townhouse:** this is a self-contained unit (usually in blocks of units) with separate legal title to ownership. They may stand alone or attached (joined to another townhouse).
- (6) **Dwelling attached to a Business:** a dwelling or dwellings adjoining a store or other commercial unit.
- (7) Other: Any type of living quarters which does not easily fit into any of the groups outlined above. For example, boat, bus, trailer, etc.

13. Types of Living Quarters

For Census purposes, dwellings were divided into two (2) main groups as follows:

- (i) **PRIVATE DWELLINGS** are those in which a family or other small group of individuals reside, such as a single house, apartment/flat, or townhouse.
- (ii) COLLECTIVE DWELLINGS included such special types of dwellings as hotels, institutions (eg. hospitals, the prison, military barracks, convents, children and old folks' homes, etc) and other group quarters in which fairly large numbers of unrelated persons are likely to reside.

14. The Status of Dwellings

Dwellings can be categorized as follows:

- 1. OCCUPIED -- during the period of the census, persons were currently living in the dwelling unit.
- **2.** <u>VACANT</u> -- any dwelling unit which is suitable for occupancy but was unoccupied at the time of the census.

15. Status of Vacant Dwellings:-

- 1. Winter Residences: private dwellings that are owned by persons from abroad.
- 2. Secondary Residences (Domestic): private dwellings that are owned by Bahamians.
- **3. For Rent:** private dwellings which are "For Rent".
- **4. For Sale:** private dwellings which are "For Sale".
- **Other:** included seasonal vacancies such as vacation or holiday homes, time-share units and seasonal workers' quarters/complexes (dwellings used to house temporary residents/workers of a project).

16. Types of Tenure

Tenure refers to the right or title by which a dwelling is occupied. The types of tenure are as follows:-

Owned fully: means that the dwelling is fully paid for i.e. no mortgage/claim exists for the dwelling.

Owned (mortgage): a dwelling which is not fully paid for such as one which has a mortgage or some other claim to it.

Rent: the dwelling does not belong to any member of the household and payments are made monthly for occupancy of the dwelling unit.

Rent Free: no member of the household pays rent for occupancy of the dwelling. The dwelling is provided free of charges, whether or not in return for services rendered e.g. parsonage or government housing.

Lease: a contract in which a dwelling is being used or occupied; an option of buying may or may not exist. Usually, the total sum and time period are stipulated in the contract.

Other: any other type of tenure not listed above. An example "squatting" wherein households were found occupying a dwelling unit without permission of the owner and without any rights to the dwelling.

17. Shelter Cost

The cost of occupying a dwelling unit is regarded as the shelter cost. In the case of units owned (mortgage), it is the monthly mortgage payments; in the case of rented units, it is the monthly rent and lease, it is the yearly leased payments, etc.

18. Water Supply

Piped Water

"Piped water" is water which is piped into the dwelling or yard and can be controlled by a tap.

Public Piped: water that is piped through public mains or is obtained from any other public source (eg. well, tank, etc) outside the private lot on which the dwelling is situated.

Private Piped: water that is piped from a private well, spring or other private source located on the property on which the dwelling is situated.

Not Piped Water

Water is not piped into the yard or dwelling unit.

Public Not Piped: can either be a public well or tank at a central location in the community that is accessible to everyone or a public standpipe or hand pump on the side of the road.

Private not Piped: this water source is usually a well that is owned by the householder and is situated on the private property.

19. Economically Active Population

The economically active population is that segment of the population, fifteen years of age and over, engaged in or willing and able to be engaged in the production of goods and services. It is composed of those persons with jobs – the employed, and those persons without jobs but who were engaged in some job-seeking activity four weeks prior to the census. Included in this population were:-

- (i) Persons who had jobs and were at work during the reference week.
- (ii) Persons who had jobs but were absent from work during the reference week because of illness, vacation, labor disputes, weather conditions, etc.
- (iii) Persons who at the time of the enumeration had never worked before and were actively seeking work during the reference week.
- (iv) Persons who had previously worked, however, at the time of the enumeration, were not working but were actively seeking work during the reference week.

Groups (i) and (ii) constitute the employed labor force and groups (iii) and (iv) represent the unemployed labor force.

20. Non – Economically Active Population

The non-economically active population is that portion of the population fifteen years of age and over who were not engaged in the production of goods and services during the census reference week; nor were they seeking to be engaged during the four weeks prior to census reference week. This population included the following groups of persons:-

Homemakers – persons who during the reference week were engaged in general housekeeping duties (within their own homes) for which they did not receive pay.

- (ii) Students persons who were attending an educational institution on a full time basis during the reference week.
- (iii) Retirees persons who had terminated their employment and were not seeking work during the reference week.
- (iv) **Disabled** persons who were incapacitated in some form and therefore were unable to work or seek work during the reference week.
- (v) Other persons receiving public aid or private support and others not falling into any of the above categories.

21. Type of Industry

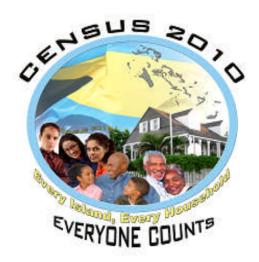

This refers to the type of work in which the individual was primarily engaged during the 12 months preceding census.

22. Type of Occupation

This is the type of work which was performed by the individual during the 12 months prior to the census and refers to his main job.

APPENDIX III

2010 CENSUS OF POPULATION AND HOUSING

BOUNDARY DESCRIPTIONS FOR SUPERVISORY DISTRICTS

APPENDIX III

2010 CENSUS OF POPULATION AND HOUSING

BOUNDARY DESCRIPTIONS FOR SUPERVISORY DISTRICTS

NEW PROVIDENCE

01 YAMACRAW

Bounded on the North by Prince Charles Drive; on the East by Milton Street, Falcon Crest, Meadows Way, Meadows Boulevard, Meadows Close, Falcon Crest, Cumberland Place to Yamacraw Hill Road; on the South to an Unnamed Road east of Saint Andrew Beach to its terminus to an imaginary line that extends to the sea; along the coast line to the high water mark that meets an imaginary line on the West of Marigold Farm Road, Lumumba Road, Fox Hill Road, Yamacraw Hill Road, Commonwealth Boulevard, Malaysia Way, Saint Vincent and Commonwealth Boulevard.

02 ELIZABETH

Bounded on the North by Pine Barren Road and Prince Charles Drive; on the East by Commonwealth Boulevard, St. Vincent Avenue, Malaysia Way, Commonwealth Boulevard, Yamacraw Hill Road and Fox Hill Road; on the South by Lumumba Road; and on the West by Marigold Farm Road, Joe Farrington Road, Sea Breeze Boulevard, Bay Lily Drive and Sea Breeze Drive.

03 SAINT ANNES

Bounded on the North, East and South by the sea; on the West by an imaginary line that extends to the terminus of an Unnamed Road (east of Saint Andrew Beach), Yamacraw Hill Road, Cumberland Place, Falcon Crest, Meadows Close, Meadows Boulevard, Meadows Way, Falcon Crest, Milton Street, Prince Charles Drive, Sherwood Drive, Camperdown Drive, an imaginary line that extends to Curtis Close and Fox Hill Road.

04 FOX HILL

Bounded on the North by Bernard Road, Cockburn Street, Step Street, Fox Hill Road, Curtis Close and an imaginary line that extends to Camperdown Drive; on the East by Sherwood Drive; on the South by Prince Charles Drive, Pine Barren Road, an imaginary line that extends to Sea Breeze Drive; and on the West by an imaginary line that extends to Spring Terrace, Winters Drive to Prince Charles Drive to Jean Street and Hill Side Park Road.

05 MONTAGU

Bounded on the North by the Sea (including Paradise Island); on the East by Fox Hill Road, Step Street and Cockburn Street; on the South by Bernard Road; and on the West by Village Road and to the prolongation of Greenwood Road an imaginary line that extends to the terminus of Perth Street to an imaginary line that extends to Highland Terrace, Shirley Street and Armstrong Street.

06 SEA BREEZE

Bounded on the North by Prince Charles Drive; on the East by Winters Drive, Spring Terrace, an imaginary line that extends to Sea Breeze Drive, Bay Lily Drive, Sea Breeze Boulevard, Joe Farrington Road and Marigold Farm Road to its terminus; on the South by the sea; on the West by an imaginary line that extends to Buttonwood Avenue, Brazilita Street, Acacia Street, Pinewood Drive, Safron Street, Sequoia Street, an Unnamed Road, North Alexandria Boulevard, East Alexandria Boulevard and its terminus, an imaginary line that extends to Freeman Smith Subdivision Road and Saint Michael Road.

07 MARATHON

Bounded on the North by Park Gate Road; on the East by Village Road, Bernard Road, Hill Side Park Road and Jean Street; on the South by Prince Charles Drive, Saint Michael Road, and Soldier Road; and on the West by Lady Slipper Avenue to its terminus, an imaginary line that extends to New Covenant Close, East West Highway, Robinson Road, Claridge Road, Balfour Avenue, Pinedale Street, Wulff Road, Kemp Road, Kingston Street, Elizabeth Street, Barbara Street, Edward Street and an imaginary line that extends to Park Gate Road.

08 SAINT THOMAS MOORE

Bounded on the North by the sea; on the East by Armstrong Street, Shirley Street, Highland Terrace to its terminus, an imaginary line that extends to the terminus of Perth Street, an imaginary line that extends to Village Road, the prolongation of Greenwood Road, Park Gate, an imaginary line that extends to Edward Street, Barbara Street, Elizabeth Street, Kingston Street, Kemp Road; on the South by Wulff Road; on the West by Mount Rose Avenue, Wilton Street, Mount Royal Avenue, Fifth Terrace, Collins Wall, an imaginary line that extends to Shirley Street and Deveaux Street.

09 FARM ROAD AND CENTERVILLE

Bounded on the North by the Sea; on the East by Deveaux Street, Dowdeswell Street, School Lane, Shirley Street to the continuation of Collins Wall, an imaginary line that extends to Fifth Terrace, Mount Royal Avenue, Wilton Street, Mount Rose Avenue; on the South by Wulff Road, Collins Avenue, Plantol Street, East Street; and on the West by Market Street, Lewis Street and East Street.

10 ENGLERSTON

Bounded on the North by Plantol Street; on the East by Collins Avenue, Wulff Road, Pinedale Street, Balfour Avenue and Claridge Road, Robinson Road, East West Highway, New Covenant Close and Lady Slipper Avenue; on the South by Frangipani Avenue, Chenille Avenue, and Marrow Lane; on the West by East Street.

11 GARDEN HILLS

Bounded on the North by Tonique Williams Darling Highway, Yellow Elder Way, Graham Drive; on the East by Blue Hill Road, Orange Blossom Avenue, Poppy Avenue, East Street, Marrow Lane, Chenille Avenue, Frangipani Avenue, Lady Slipper Avenue, Soldier Road and Emmanuel Drive; on the South by Malcolm Road, Blue Hill Road, and Carmichael; on the West by Shrimp Road, Adderley Terrace, Canterbury Road, to an imaginary line that extends to Maes Court, Hamster Road, Faith Avenue, Fire Trail Road to an imaginary line that extends to Knowles Drive.
