#### FOREWORD

This report presents information on occupations and their corresponding average and median wage collected in the 2011 Wages and Productivity survey. In 2011 the Department partnered with the Inter-American Development Bank (IDB) to conduct the Wages and Productivity survey. The results of the productivity section were released to the public under separate cover by the IDB.

The objective of the overall survey was to provide data that will guide the government and private sector planners and employers on labour market issues including wages, gaps in labour force skills and current training practices.

The survey was conducted on the islands of New Providence and Grand Bahama and the data are produced and presented separately for each.

The reference period for the survey was the last pay period ending 30<sup>th</sup>, November 2011.

Information on the sample design along with concepts, definitions and methodology are contained in this report.

Kelsie Dorsett Director of Statistics

#### ACKNOWLEDGEMENT

The Department of Statistics wishes to acknowledge the valuable contribution, cooperation and assistance of the public and the participating establishments in New Providence and Grand Bahama in the 2011 Wages and Productivity survey. We again look forward to and appreciate their continued support.

The valuable contributions of Inter-American Development Bank, Department of Statistics staff mainly in the Labour Market Information Unit and especially Annshanique Edgecombe are acknowledged.

This report was produced by Carmen Dawkins under the supervision of Kelsie Dorsett, Director, and Leona Wilson, Deputy Director of Statistics.

#### KEY FINDINGS OF THE OCCUPATIONAL WAGE SURVEY: NEW PROVIDENCE, 2011

| Sex    | Average Normal<br>Hours Worked<br>Per Week | Average<br>Hourly<br>Wage | Average<br>Weekly<br>Wage | Median<br>Weekly<br>Wage | Average<br>Annual<br>Wage | Median<br>Annual<br>Wage |
|--------|--|---------------------------|---------------------------|--------------------------|---------------------------|--------------------------|
| Total  | 40   | \$12                      | \$483                     | \$345                    | \$25,141                  | \$17,940                 |
| Male   | 40   | \$13                      | \$505                     | \$350                    | \$26,276                  | \$18,200                 |
| Female | 39   | \$12                      | \$463                     | \$343                    | \$24,081                  | \$17,836                 |

The three occupational groups with the highest average annual wage were:

- Managers, Chief Executives and Senior Officials \$42,853 (males, \$45,173; females, \$40,851)
- Professionals, Science and Engineering Professionals \$42,944 (males, \$47,541; females, \$40,625)
- Technicians and Associate Professionals \$28,292 (males, \$28,195; females, \$28,366).

The occupational group with the *lowest* average annual wage was the Elementary Occupations with \$12,710 (males, \$13,557; females, \$11,881).

*Industrial groups* with the *highest* average annual wage were:

- Financial and Insurance Activities \$49,322 (males, \$56,306; females, \$45,759)
- Electricity, Gas, Air Conditioning and Water \$43,783 (males, \$42,672; females, \$46,898)
- Human Health and Social Work Activities \$39,009 (males, \$47,886; females, \$37,455).

The *industrial group* with the *lowest* average annual wage was Accommodation and Food Service Activities with \$19,548 (males, \$18,859; females, \$20,328).

The average normal hours worked per week was *highest* (42) among Managers, Chief Executives and Senior Officials, Skilled Agricultural and Fishery Workers and Plant and Machine Operators and Assemblers (41) and the *lowest* (38) for workers in the Elementary Occupational group.

Almost all (91%) of the employees had attained the minimum education required by the establishment for their occupation

Fifty nine percent (59%) of the employees had completed Secondary School education.

# **KEY FINDINGS OF THE OCCUPATIONAL WAGE SURVEY: GRAND BAHAMA,** 2011

| Sex    | Average<br>Normal<br>Hours<br>Worked<br>Per Week | Average<br>Hourly<br>Wage | Average<br>Weekly<br>Wage | Median<br>Weekly<br>Wage | Average<br>Annual<br>Wage | Median<br>Annual<br>Wage |
|--------|--|---------------------------|---------------------------|--------------------------|---------------------------|--------------------------|
| Total  | 41   | \$10                      | \$374                     | \$308                    | \$19,459                  | \$16,016                 |
| Male   | 41   | \$10                      | \$400                     | \$361                    | \$20,775                  | \$18,772                 |
| Female | 41   | <b>\$9</b>                | \$347                     | \$288                    | \$18,069                  | \$14,976                 |

The three occupational groups with the highest average annual wage were:

- Managers, Chief Executives and Senior Officials \$32,993 (males, \$31,913; females, \$34,301)
- Professionals, Science and Engineering Professionals \$30,325 (males, \$33,894; females, \$28,827)
- Technicians and Associate Professionals \$26,253 (males, \$26,973; females, \$25,227)

The *occupational group* with the *lowest* average annual wage was the Elementary occupational group with \$12,051 (males, \$12,570; females, \$10,679).

*Industrial groups* with the *highest* average annual wage were:

- Financial and Insurance Activities \$38,080 (males, \$56,765; females, \$33,048)
- Human Health and Social Work Activities \$31,401 (males, \$31,849; females, \$31,237)
- Real Estate Activities \$27,342 (males, \$27,716; females, \$27,029)

The *industrial group* with the *lowest* average annual wage was Information and Communication with \$12,168 (males, \$12,415; females, \$11,886).

The average normal hours worked per week was *highest* (48) in the Real Estate Industry, followed by (46) in Arts, Entertainment, Recreation and Other Service Activities, and (41) each in Mining, Quarrying and Manufacturing and Wholesale and Retail Trade.

Almost all (91%) of the employees had attained the minimum education required by the establishment for their occupation.

Sixty eight percent (68%) of the employees had completed Secondary School education.

# **1. DATA AND METHODOLOGY**

This section outlines the survey methodology and the field operation

# 1.1 Sample Design

### 1.1.1. Scope of the Survey

The scope of the survey included all business establishments in New Providence and Grand Bahama with five (5) or more employees.

### 1.1.2. Reporting Unit and Frequency

The reporting unit was the business establishment.

### 1.1.3. Sampling Frame

The base for the sample frame is the Department of Statistics' 2010 Business Establishment Register. The Register was generated by documenting every business with a sign indicating the name of the establishment, and that they were in operation during March 2009. The Register does not include establishments in the following International Standard Industrial Classification of All Economic Activities categories (ISIC): Agriculture, forestry and fishing; Public administration and defence, compulsory social security; Activities of households as employers, undifferentiated goods-and-services-producing activities of households for own use; and Activities of extraterritorial organizations and bodies. It also excludes churches and non-governmental organisations in the "Other service activities industry".

The 2010 Register also excluded establishments in the "Financial and insurance activities" industry. As such, lists of financial institutions from the Central Bank, and a list of insurance companies from the Registrar of Insurers, were added to the sample frame.

The Register was cleaned to remove duplicates and establishments known to have ceased operations. For establishments with parent companies, the parent company was identified, and subsidiaries removed from the sample. The frame was further restricted to only those companies with 5 or more employees.

The final sampling frame for New Providence included 1,901 establishments, and for Grand Bahama 477 establishments (a total of 2,378 establishments). The estimated total employment of those establishments was 65,677<sup>1</sup>.

<sup>&</sup>lt;sup>1</sup> Estimates of the numbers of employees were not available for all establishments in the financial and insurance industries for New Providence or Grand Bahama, so this number is not equal to the actual number of employees.

#### Table i: Sample Frame Distribution<sup>2</sup>

| Establishment Size    | Both Islands | New Providence | Grand Bahama |
|-----------------------|--------------|----------------|--------------|
| 5 -19 employees       | 1,805        | 1,442          | 363          |
| 20 - 49 employees     | 342          | 270            | 72           |
| 50 and more employees | 231          | 189            | 42           |
| TOTAL                 | 2,378        | 1,901          | 477          |

Source: Department of Statistics, Central Bank of The Bahamas, and Registrar of Insurance

#### 1.1.4. Sampling: Clustering, Stratification and Allocation

Two-stage sampling was conducted, with establishments in the first stage being clustered by island (New Providence versus Grand Bahama).

In the second stage, stratification was conducted by industrial group, at the 1digit level of the ISIC. Due to small sample sizes of some industrial groups, the following categories were combined:

- Mining and quarrying AND Manufacturing
- Electricity, gas, steam and air conditioning supply AND Water supply; sewerage, waste management and remediation activities
- Professional, scientific and technical activities AND Administrative and support service activities
- Arts, entertainment and recreation AND Other service activities

Additionally, the sample was further stratified by employment size (5-19 employees, 20-49 employees, and 50 employees or more).

To be consistent with prior sampling adopted by the Department of Statistics in previous Occupational Wage Surveys, the allocation of the reporting units was done using disproportional allocation. The following allocation was used:

- (1) 100% of all large establishments (those with 50 or more employees) were selected.
- (2) Due to their small population sizes, establishments in two industry categories were sampled with certainty from both islands (a) Electricity gas steam and air conditioning; Water supply; sewerage, waste management and remediation activities and (b) Information and communication.
- (3) For New Providence, the remaining strata were sampled proportionally in accordance to the population size, unless that would provide a sample size of less than 20 in that industry. Extra allocation points were assigned to those strata (and deducted from the strata with the three highest number of points) until all industrial strata would contain a population of

<sup>&</sup>lt;sup>2</sup> As noted earlier, the number of employees was not available for some establishments in the financial and insurance sectors – for these purposes the unknown size establishments are counted as being in the <20 employee range.

more than 20 (assuming there were at least 20 establishments in that cell of the frame).

(4) For Grand Bahama, 100% of all establishments in three additional industry categories were sampled, due to their small population sizes: (a) Financial and insurance activities (b) Real Estate and (c) Human health and social work activities. The remaining strata were sampled proportionally in accordance to the population size, unless that would provide a sample size of less than 15 in that industry.

For the proportional allocation:

 $n_h = n^*(N_h/N)$ 

 $n_h$ =the sample size within a particular hth stratum and

 $N_{h}$ =the population within the hth stratum.

### 1.1.5. Sample Selection

The following final distribution of establishments, by size, was taken from the sample frame:

#### Table ii: Sample Distribution<sup>3</sup>

|  | 5 - 49<br>employee |     | All |
|--|--------------------|-----|-----|
|  | S                  | S   |     |
| New Providence   | 332                | 189 | 521 |
| Grand Bahama   | 161                | 40  | 201 |
| Both Islands   | 493                | 229 | 722 |
| New Providence:  |                    |     |     |
| Mining and quarrying and manufacturing                             | 26                 | 7   | 33  |
| Electricity, gas, steam and air conditioning supply; Water supply, | 10                 | 3   | 13  |
| sewerage, waste management and remediation activities              |                    |     |     |
| Construction   | 19                 | 10  | 29  |
| Wholesale and retail trade; repair of motor vehicles and           | 82                 | 50  | 132 |
| motorcycles  |                    |     |     |
| Transportation and storage   | 25                 | 6   | 31  |
| Accommodation and food service activities                          | 23                 | 33  | 56  |
| Information and communication                                      | 16                 | 7   | 23  |
| Financial and insurance activities                                 | 12                 | 24  | 36  |
| Real estate  | 29                 | 2   | 31  |
| Professional, scientific and technical activities; Administrative  | 10                 | 22  | 41  |
| and support service activities                                     | 19                 | 22  | 41  |
| Education  | 22                 | 14  | 36  |
| Human health and social work activities                            | 27                 | 3   | 30  |
| Arts, entertainment and recreation; Other service activities       | 22                 | 8   | 30  |
| Grand Bahama:  |                    |     |     |

<sup>&</sup>lt;sup>3</sup> As noted earlier, the number of employees was not available for some establish1ments in the financial and insurance sectors – for these purposes the unknown size establishme6nts are counted as being in the <20 employee range.

|   | 5 - 49<br>employee<br>s | 50+<br>employee<br>s | All |
|---|-------------------------|----------------------|-----|
| Mining and quarrying and manufacturing                            | 6                       | 7                    | 13  |
| Electricity, gas, steam and air conditioning supply and Water     | 3                       | 2                    | 5   |
| supply; sewerage, waste management and remediation activities     |                         |                      |     |
| Construction  | 14                      | 1                    | 15  |
| Wholesale and retail trade; repair of motor vehicles and          | 26                      | 6                    | 32  |
| motorcycles   |                         |                      |     |
| Transportation and storage  | 7                       | 8                    | 15  |
| Accommodation and food service activities                         | 19                      | 8                    | 27  |

#### 1.1.6. Survey Response Rate

Of the original 521 establishments in the sample from New Providence, it was determined that there were 7 duplicates, 4 were establishments that were subsidiaries of a parent company, and 45 had closed for a total of 465 establishments actually eligible for interviews. In Grand Bahama, 19 establishments had closed. As a result, the final sample contained 647 establishments (465 in New Providence, 182 in Grand Bahama).

Overall, 504 of 647 responded, for an overall response rate of 80%. The table below shows the response rate, by island. In New Providence, 372 of 465 eligible establishments responded, for a response rate of 80.0% while in Grand Bahama, 132 of 182 eligible establishments responded, for a response rate of 78%.

|   | Both Islands | New Providence | Grand Bahama |
|---|--------------|----------------|--------------|
| Total establishments eligible for interview | 647          | 465            | 182          |
| Establishments duplicated                   | 11           | 11             | 0            |
| Establishments closed                       | 64           | 45             | 19           |
| Total                                       | 722          | 521            | 201          |
| Total non-response                          | 143          | 93             | 50           |
| Response                                    | 504          | 372            | 132          |
| Non-response rate                           | 20%          | 27.5%          | 22.1%        |
| Response rate                               | 80%          | 80%            | 78%          |

#### Table iii: Selected Establishments and Response and Non-Response Rates

Source: Department of Statistics

### 1.2. Survey Instrument Design

The survey instrument was designed to obtain information on wages by industry and occupation, as well as labour market issues regarding labour force skills development and productivity.

#### 1.2.1. Drafting of Survey Instrument

The first draft of the survey instrument was created through the merger of two existing surveys: (1) the Inter-American Development Bank's "Productivity Survey and Assessment of Training in Establishments" (Employers' Survey, or ES) that had already been conducted in Honduras, Panama and Uruguay; and (2) The Bahamas Department of Statistics' Occupational Wage Survey (OWS), which is conducted every four years, and last conducted in 2007.

An initial analysis was done to compare the scope of the two questionnaires, and all similar questions were highlighted for inclusion. Questions in the ES which were not relevant for The Bahamas were removed, some were edited to become more nationally significant, and some additional productivity-based questions were added after consultation with The Bahamas Chamber of Commerce and other stakeholders such as the Department of Labour.

During the training of the enumerators in New Providence (see below), additional edits were made to the survey instrument to improve the questionnaire's flow.

#### 1.2.2. Pilot Test of Survey Instrument and Debrief

After the New Providence enumerators training was completed, a pilot test was conducted in December  $5^{th} - 13^{th}$ , 2011.

A non-random sample of 20 establishments (all <50 employees) was drawn from the sample. Data was received from 14 of the 20 establishments, for a pre-test response rate of 70%. After the pre-test, all enumerators and supervisors discussed the questionnaire and interview process during a debrief on December 19<sup>th</sup>, 2011 and additional minor edits were made based on those findings.

The final questionnaire is provided in appendix III.

# 1.3. Training, Fieldwork and Data Entry

### 1.3.1. Training of Enumerators

The training of enumerators took place in two locations: New Providence, November  $21^{st} - 25^{th} 2011$  and Grand Bahama, January  $24^{th} - 25^{th} 2012$ .

At the New Providence training, eleven enumerators and three supervisors participated in a four day training exercise which had two main objectives:

- instruct the enumerators in the survey background, actual questionnaire and the interview process, and
- refine the questionnaire in preparation for the pilot survey.

One of the enumerators withdrew from the project in early January and was replaced by two additional enumerators who underwent a separate training exercise.

Prior to training enumerators in Grand Bahama, the final questionnaire had been completed. Therefore only two days of training were required and one supervisor and six enumerators were trained.

#### 1.3.2. Fieldwork

In New Providence fieldwork commenced on January 12<sup>th</sup>, 2012. The 521 selected establishments were placed into 11 geographical groups, and allocated to the 12 enumerators as indicated in Table iv.

In Grand Bahama fieldwork commenced on January 26<sup>th</sup>, 2012. The 201 selected establishments were allocated to the six enumerators as indicated in Table v.

|               | # of<br>Establishments |
|---------------|------------------------|
| Enumerator 1  | 48                     |
| Enumerator 2  | 47                     |
| Enumerator 3  | 47                     |
| Enumerator 4  | 48                     |
| Enumerator 5  | 46                     |
| Enumerator 6  | 47                     |
| Enumerator 7  | 48                     |
| Enumerator 8  | 47                     |
| Enumerator 9  | 48                     |
| Enumerator 10 | 48                     |
| Enumerator 11 | 24                     |
| Enumerator 12 | 23                     |

#### Table iv: Allocation of Establishments to Enumerators in New Providence

Source: Department of Statistics

#### Table v: Allocation of Establishments to Enumerators in Grand Bahama

|              | # of<br>Establishments |
|--------------|------------------------|
| Enumerator 1 | 25                     |
| Enumerator 2 | 27                     |
| Enumerator 3 | 40                     |
| Enumerator 4 | 43                     |
| Enumerator 5 | 26                     |
| Enumerator 6 | 40                     |

Source: Department of Statistics

Enumerators on both islands conducted interviews until April 30<sup>th</sup>, 2012. Some questionnaires had been left with establishments for them to fill in certain portions by themselves. All questionnaires were submitted to the Department of Statistics by May 18<sup>th</sup>, 2012.

#### 1.3.3. Data Entry

Training for data entry clerks in the Department of Statistics was conducted on February 27<sup>th</sup>, 2012.

Editing was done by supervisors and data entry clerks in order to remove inconsistent or erroneous items, and ensure completeness. Data coding was then required for occupation and industry using the ISCO and ISIC, respectively.

The Census and Survey Processing System (CSPro) of the United States Bureau of Census was used to complete the data entry of the various survey schedules, verify the data captured and check and correct inconsistencies within survey results.

Computer editing and correction were performed using the Batch Edit tool of CSPro for data cleaning. Range checks, indicating the minimum and maximum values of variables that were built in, were also reviewed at this stage. After the final data cleaning, STATA data files were produced by using the export data tool of CSPro.

Additional data checks were conducted in STATA, until a final database was created on August 29<sup>th</sup>, 2012.

### 1.3.4. Weight Creation

A series of weights were created for the data as outlined in this section. Weights were created based on the island, industry and size (3 strata: 5-19, 20-49 and 50+). Note that size and industry sometimes differed between the final survey and the sampling frame. The original sampling frame was used whenever the information was incomplete- otherwise the survey responses were used.

Weights were calculated counting all non-responses. An additional set of weights was also created based on some data imputation/manipulation. This was considered appropriate because for some cells (a specific industry and size within an island) the response rate was 0. The improvised method used was to shift the size for this cell by 1 i.e., if there were no responses for companies of

size 20-49 for industry 8 on Grand Bahama, they were shifted to the same island and industry but to the smaller size (5-19). This effectively reduced the response rate in that cell, resulting in higher weights. The assumption is made that there is not a large difference between companies with slightly different sizes. The alternative is to simply lose all information. It was assumed that the imputed values are better (weight i1a and weight i2a).

**Note:** For certain strata and industries the weight is simply the inverse of the response rate because these cells were sampled at 100%. For others it is the inverse of the response rate times the inverse of the proportion sampled. The proportions came from the full sampling frame files. The weights have been merged back into the original data.

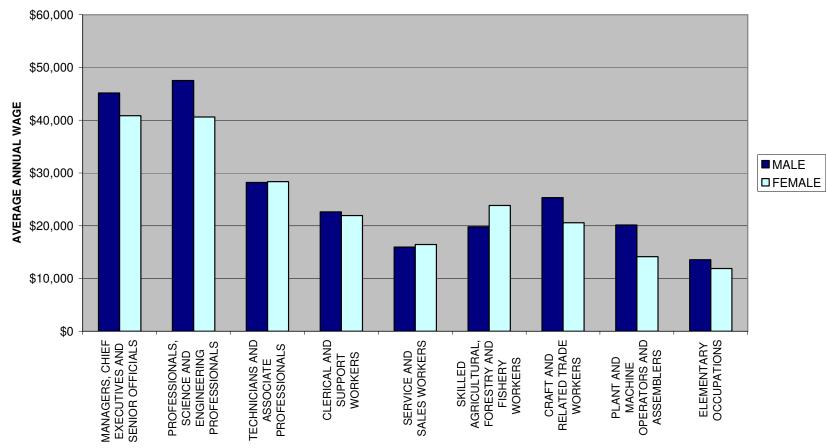

| OCCUPATIONAL GROUP  | Mean<br>(Average) | Standard<br>Error | Coefficient<br>of<br>Variation |
|---|-------------------|-------------------|--------------------------------|
| Managers, Chief Executives and Senior Officials                           | \$824             | 29.38             | 81.4%                          |
| Professionals, Science and Engineering Professionals                      | \$826             | 32.13             | 86.1%                          |
| Technicians and Associate Professionals                                   | \$544             | 15.71             | 65.3%                          |
| Clerical and Support Workers  | \$425             | 9.66              | 55.6%                          |
| Service and Sales Workers   | \$311             | 6.09              | 68.6%                          |
| Skilled Agricultural, Forestry and Fishery Workers                        | \$394             | 29.54             | 38.2%                          |
| Craft and Related Trade Workers   | \$480             | 18.29             | 53.9%                          |
| Plant and Machine Operators and Assemblers                                | \$362             | 19.38             | 72.2%                          |
| Elementary Occupations  | \$244             | 4.30              | 45.3%                          |
| INDUSTRIAL GROUP  |                   |                   |                                |
| Mining, Quarrying and Manufacturing                                       | \$405             | 17.99             | 58.7%                          |

# **APPENDICES**

# APPENDIX I SURVEY NOTES

### Notes:

In 2007 the Agricultural Sector, Hotels and Government were not surveyed. In 2011 the Agricultural Sector and Government were not surveyed.

### Selection of employees/occupation in establishments with 50+ employees in 2007

At the second stage a representative sample of the employees was drawn from the payroll records of each selected reporting unit using a systematic sampling method. This procedure ensured that each employee had an equal probability of selection.

A random start for the first selected employee and a skip for other selections were provided to each selected establishment. Employers with 49 or less employees were required to complete the information for all employees. The occupations recorded were those actually performed by the selected employees. The reported data were then used to produce estimates of earnings, actual and normal hours worked and methods of pay.

The selection procedure was designed to produce a representative sample of employees in The Bahamas. It was not designed to produce a representative sample of employees within each responding unit.

### Selection of employees /occupation in establishments with 50+ employees in 2011

### Sample Selection 50+

For each industry group, the allocation of establishments with 50 and more employees was sampled with certainty using proportional allocation from the business register.

A representative sample of the employees was drawn from the payroll records of each selected establishment using a systematic sampling method. This procedure ensured that each employee had an equal probability of selection.

A random start and an interval were provided to each selected establishment for selection of employees to be included in the survey. When the number of employees selected was less than two, the numbers were rounded up to 5 employees.

## APPENDIX II CONCEPTS AND DEFINITIONS

### DEFINITIONS

### Occupation

A set of jobs for which the main tasks and duties are characterized by a high degree of similarities (e.g. filing clerk, accountant).

### Time-period

Full-time or part-time employees paid on the basis of a time unit of work such as an hour, a day, a week, a fortnight or a month.

### Employee

A person who works for a public or private employer and receives remuneration in wages, salary, commission, tips, or piece rates. This definition covers both wage earners and salaried employees. Thus working proprietors, unpaid family workers and managerial staff remunerated predominantly by a share of the profits are *excluded* from the definition of employee.

### Basic pay/wage rate

Includes basic wages, cost of living allowances and other guaranteed and regularly paid allowances, but **exclude** overtime payments, bonuses and gratuities, family allowances, and other National Insurance payments made by employers. *Ex gratia (as a favour, not compelled by legal right, e.g. Workers in Hotels and Restaurants may receive meals and accommodation free of charge as part of their wages) payments supplementary to normal wage rates are also excluded.* 

**Commission** (a fee or percentage allowed to a salesperson or agent for his/her services) should be *included* as a part of basic pay/wage rate.

### Earnings

Remuneration in cash paid to employees, as a rule at regular intervals, for time or work done together with remuneration for time not worked, such as annual vacation, other paid leave or holidays. Earnings *exclude* employers' contribution in respect of their employees paid to National Insurance and pension schemes and also the benefits received by employees under these schemes. Earnings also *exclude* severance and termination pay.

### Sex

Employee either male or female.

#### Age

The age of the employee on or before November 30<sup>th</sup> 2011.

#### Status

Employee employed either full-time or part-time.

### Nationality

The legal nationality or citizenship of the employee. It is not necessarily related to place of birth.

### Education

The entry level educational qualifications required for the occupation held by the employee. For example, advertisements for various jobs/occupation would indicate what educational qualifications are required for that particular occupation.

### No. of normal hours worked per week

Hours of work fixed by or in pursuance of laws or regulations, collective agreements or arbitral awards. Where not so fixed, "normal" hours of work should be taken as meaning the number of hours per day, or week, in excess of which any time worked is remunerated (*to pay an employee for services rendered*) at overtime rates or forms an exception to the rules or customs of the establishment relating to the classes of workers concerned.

### Hours actually worked per week

Includes:

- Hours actually worked during normal periods of work;
- Time worked in addition to hours worked during normal periods of work and generally paid at higher rates than normal rates (overtime);
- time spent at the place of work on work such as the preparation of the workplace, repairs and maintenance, preparation and cleaning of tools, and the preparation of receipts, time sheets and reports;
- time spent at the place of work waiting or standing by for such reasons as lack of supply of work, breakdown of machinery or accidents, or time spent at the place of work during which no work is done but for which payment is made under a guaranteed employment contract;
- Time corresponding to short rest periods at the workplace, including tea and coffee breaks. Hours actually work should **EXCLUDE**:
  - Hours paid for but not worked, such as paid annual leave, paid public holidays, paid sick leave;
  - Meal breaks and
  - Time spent on travel from home to workplace and vice versa.

### Vacancy

One or more vacancies exist when:

- (a) An employer has made an effort at least four (4) weeks prior to and during the reference period (pay period ending September 30, 2007) to find one or more persons to provide labour-services;
- (b) The employer would have engaged one or more suitable candidates to work during the reference period if they had been available, and would have not fired anyone as a consequence.

© Vacancies also exist if only (b) is satisfied and the employer either is in the process of selecting someone from among the suitable candidates or is waiting for such a candidate to accept a job or to start working.

### Worker Category

The classification of staff according to their functions within the hierarchical organizational structure and establishment, taking into consideration factors such as decision-making, planning, monitoring, policy control, personal control and enforcement in accordance with instructions:

**Managerial and Supervisory positions:** The managers are responsible for tasks related to executive decisions, direction, strategic planning and organizational policies. They are in charge of specific areas of the company. The supervisors are responsible for directly supervising workers in the execution of their tasks.

*Skilled workers (Qualified/Skilled/Specialized workers in production or services):* These are workers with high level of skills, specialization and/or experience in their tasks, and who work directly in the main activity of the company. (i.e., production, retail or services processes).

**Unskilled workers (engaged in production or services):** These are workers who have less preparation and education for performing their tasks working in the production or service processes. In general they are assistants to the skilled workers, and may need to be supervised in their operations.

**Other workers (Other support workers):** Workers in this category have tasks that are not directly related to the main activity of the establishment. This can include administrative workers (secretaries), lawyers, accountants, etc., and all type of workers who are in charge of secondary activities, not related to the main economic activity of the establishment. For instance, an accountant for a restaurant does not work in the provision of restaurant services, but in the accounting of the restaurant.

### Occupations and number of employees that will be required by the establishment in the next one, three and five years.

This part of the questionnaire is designed to obtain information on manpower planning. The occupations and number of employees projected to be hired in the next, one, three and five years.

### Certification of respondent

This information is necessary in the event questions arise concerning the data given to the interviewer by the establishment. If so, the Department of Statistics would have a contact person to assist with the queries.

The information to be given to the interviewer is:

- The employee's name
- The employee's position in the establishment
- The establishment's fax number
- The establishment's telephone number
- The establishment e-mail address (where available) and
- The date the questionnaire was completed

The employer could also give the interviewer constructive comments on the data given to the Department of Statistics. Comments such as the length of time it took to complete the questionnaire and the ease in using the questionnaire.

The interviewer should also record any suggestions that the establishment may have on improving the design and contents of the questionnaire.

# APPENDIX III THE QUESTIONNAIRE

<u>CONFIDENTIAL</u> Your completed form remains confidential to the Department of Statistics and will be integrated with similar establishments and disseminated in aggregate statistical tables and analyses only.

#### 2011 Wages and Productivity Survey Reference Period: 30th November, 2011

This survey is being taken in exercise of the powers conferred by section 9, subsection (1) of the Statistics Act 1973: "Any person required to furnish information, estimates, or returns, or to supply particulars under this Act who fails so to do shall be guilty of an offence."

Purpose of the survey: To provide data regarding occupational wages, productivity levels, training practices, and gaps in employee skill levels.

|        |     |          | An indefinite or permanent contract is for full-time or part-time work for an indeterminate period.   |
|        |     |          | A fixed term contract is a contract of employment that ends when a specific time period expires, or when a specific task that has a time estimate attached is completed.          |
|        |     |          | A temporary contract of employment is of limited duration and terminated by a specific event, including the end of a project or work phase,<br>return of replaced personnel, etc. |
